ESKIMO^{IV}

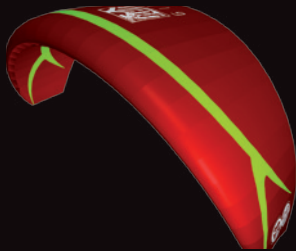

FREESTYLE – FREERIDE

The new ESKIMO IV is dedicated to discerning riders who are looking for a top quality kite with active, responsive handling. Its flight characteristics are similar to a tube kite, offering quick response, high performance and incredible lift, while retaining the clear benefits of a foil kite for snowkiting.

L'ESKIMO IV est dédiée aux riders confirmés recherchant les sensations d'un pilotage actif. Ses caractéristiques de vol se rapprochent d'une aile à boudin par sa réactivité, son rendement et son lift incroyable, tout en conservant les avantages indéniables d'une aile à caisson pour le snowkite.

Der ESKIMO IV ist für ambitionierte Fahrer gemacht, die beim Kiten nach den grossen Glücksmomenten suchen. Seine Flugeigenschaften sind mit denen eines Tubekites vergleichbar: sehr schnelle und präzise Reaktion, hohe Kräfteentwicklung und ein unglaublich starker Lift. Der ESKIMO IV bietet aber auch alle Vorteile eines Foilkites, auf die man beim Snowkiten nicht verzichten will.

- Higher aspect ratio and more arc for even higher performance, combined with unmatched responsiveness and manoeuvrability.
- 5th line safety system for a total depower.
- Improved and refined flight qualities.
- The kite pulls more at the edge of the window for formidable up wind performance.
- Carbon bar, reinforced pre-lines and flying lines.
- Double safety system and no-twist swivel system.

The new ESKIMO IV pack is designed for all your freeride backcountry snowkite needs

- Specific straps designed to carry skis and sticks or snowboard.
- Camel Bag inner pocket with protection of the tube from the cold
- Pocket for your iPhone®.
- Ergonomical design.
